

Items at Home – Fractions

Directions: Find 8 items at home that you can “break” (do your parent a favor and don’t really break it) into different pieces, up to 8 pieces or parts, of the whole item. Use tape to mark the pieces of the whole item. Draw your items below and how you broke them up using tape. Then if you were to share 1 piece of each item with your parent, write down the fraction that you would be sharing.

Example:

Items
